ABOUT MYSELF

I recently graduated from Masaryk University with a Master's degree in IT, specializing in Game Development. Previously, I earned a bachelor's in Information Technology from VUT FIT, where I gained experience in programming, mathematics, electronics, and software systems. I decided on a Game Development major because of my passion for games. Eager to further develop my technical skills, collaborate on creative projects, and gain industry experience. I'm from Slovakia but currently based in Brno, Czech Republic.
